Fulvous-vented Euphonia ♀
Eufonia fulva
Euphonia fulvicrissa

Size guide

- Large, like a toucan
- Medium, like a tanager
- Small, like an euphonia

Panama Fruit Feeder Cam

common visitors

The Panama Fruit Feeder Live Cam is one of the several live cameras installed in different parts of the world by the Cornell Laboratory of Ornithology. It streams live 24/7. The Panama Fruit Feeder Cam was installed on the fruit feeder at the Canopy Lodge, in El Valle de Antón, Panama in December, 2017. It started transmitting live in January 2018 with the collaboration of explore.org.

Through mid-2024, 81 bird species and 12 non-bird species, including basilisks, bats, opossums, and other mammals, have been registered visiting the Panama Fruit Feeder. Butterflies also visit the feeder. We only include the most common bird species in this guide; contact us for the complete Panama Fruit Feeder Cam guide. You can watch the live cam at:

<https://www.youtube.com/watch?v=WtoxxHADnGk> and follow the camera highlights at: <http://allaboutbirds.org/panamafeeders>.
